Testing_Report_Sample.csv

The testing process covered multiple aspects of the e-commerce application to ensure functionality, error handling, and responsiveness. Test Case TC001 validated the product listing page, confirming that all products were displaye correctly, with no issues found. Test Case TC002 focused on API error handling by simulating a disconnected API and verifying that a fallback UI with an appropriate error message was shown, which worked as intended. Test Case TC003 tested the cart functionality by adding products to the cart and confirming the updates were reflected accurately, demonstrating smooth performance for high-severity requirements. Lastly, Test Case TC004 ensured the application's responsiveness by resizin the browser window and verifying that the layout adjusted correctly to different screen sizes, successfully meeting mobile usability standards. All test cases passed, highlighting the application's robust design and functionality.

Test Case ID	Test Case Description	Test Steps	Expected Result	Actual Result	Status	Severity Level	Assigned To	Remarks
TC001	Validate product listing page	Open product page > Verify products	Products displayed correctly	Products displayed correctly	Passed	Low	-	No issues found
TC002	Test API error handling	Disconnect API > Refresh page	Show fallback UI with error message	Error message shown	Passed	Medium	-	Handled gracefully
TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	Cart updates as expected	Passed	High	-	Works as expected
TC004	Ensure responsiveness on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	Responsive layout working as intended	Passed	Medium	-	Test successful
